LEARNING, TEACHING, TRAINING ACTIVITY

On the 5th, 6th and 7th of April, Youth workers from Austria, Italy, Germany, Romania and Portugal have participated at an online learning - teaching - training activity of the Health Without Borders project to learn more about the educational resources on health literacy developed in the project, to better understand the principles of health literacy, to understand the importance of a cohesive communication strategy while working on health literacy with marginalised youth, to understand the principles and benefits of embedded learning environments with youth and to understand the principles and benefits of using comics, storytelling and gamification strategies while working with marginalised youth.

CONGRATULATIONS

TRANSNATIONAL PARTNER MEETING

During the month of April we also had our 3rd TPM via ZOOM. We talk about the next steps for the development of the online portal and our multiplier events in each country.

The **Online Portal (IO3)** is now available in English: Portal_Home_ENG - Health With Out Borders

In the Portal we have the Health Without Borders Toolkit of Resources and the four modules of In-Service Training.

It is still under construction and in the coming months all resources will be available in the languages of the partners: Portuguese, German, Italian, Romanian and Arabic.

Besides the Toolkit and the In-Service Training, the Portal will have more surprises! We leave a picture of what is to come. Stay in touch!

The training was facilitated by our partners InterAktion (www.verein-interaktion.org) and University of Pitesti.

During the three days we participated in several interactive activities and the training promoted individual and group reflection on health literacy.

They were days of much sharing of experiences. .
